Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Prosecution on the merits of this application is reopened on claims 34-49 that are considered unpatentable for the reasons indicated below:

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 34-36, 38-46 are rejected under 35 U.S.C. 102(e) as being anticipated by Samuels (US Patent 5,848,964). The Samuels Patent discloses an embolic filtering embolic having limitations of:

- a support hoop (12);
- attached to elongate member (14);
- distally facing blood permeable sac (16) and an;
- an articulation region shown in figure 2.

Concerning, the delivery sheath, see col. 4, lines 49-65.

Claims 34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Barbut et al (US Patent 5,662,671). The Samuels Patent discloses an embolic filtering embolic having limitations of:

Art Unit: 3731

- a support hoop (70);
- attached to elongate member (51) via spokes (55);
- distally facing blood permeable sac (75) and an;
- an articulation region (joints between tubes 57 and 70, best illustrated in figure 2.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Samuels in view of Barbut et al (US Patent 5,769,816). Providing emboli filters with shape memory material is well known in the art. Barbut et al discloses a shape memory filter device. It would have been obvious to one ordinary skill in the art to form the hoop member of Samuels with shape memory material so that it can readily open by sensing the temperature change.

French Patent 2,694,687 of record discloses a blood filter device with a retractable catheter to assist in removal of filtered material.
